SENTINEL S35
DATASHEET

LIKE **A WOLF.** IN
SHEEPS CLOTHING

DEAD VERSATILE

Introducing the S35: Compact yet Bloody Fierce.

This isn't just a small fog unit; it's a tactical masterstroke in security. Imagine it as a wolf—devastatingly effective when it hunts in packs. Combine these small units, and you've set an ungodly ambush that'll leave intruders stumbling and cursing.

Ideal for a multitude of spaces—homes, server rooms, offices, and shops—this pint-sized powerhouse comes at an irresistible price point.

Don't be fooled by its petite form. Inside, an internal battery backup ensures you're fortified against any power outage, keeping your sanctuary locked down and impenetrable.

Installation? Forget the hassle; we've streamlined this beast so you can arm it quicker than you can utter 'secure this.'

Behold the S35—where modest dimensions mask a gutsy little guardian

PERFORMANCE

- Like A Wolf!

FEATURES

- 3-year warranty
- 40 second initial burst for maximum smoke generation in risk critical areas
- Minimum 40 minutes off-mains operational capability
- Energy save mode cuts costs in periods when the generator is not immediately needed
- Supports automatic re-firing via screen-sensor technology
- Extreme temperature operation: -10°C to 50°C
- £10 million product and public liability insurance
- 5 inputs and 8 outputs
- LCD status display and on-board event log.

FUTURE COMPATIBILITY

- IP Upgrade available for link to *Sentience Programme*.

CONSTRUCTION

- Rugged and compact steel casing in pure white
- Environmental pack for installation in confined spaces with elevated ambient temperatures
- Machined steel heater block allows use of most persistent smoke chemical.

STANDARDS COMPLIANCE

- EN50131:8 and IEC62642:8
- CNPP Rating: Class I Category 30.

FLUID

- 500ml fluid system (*expansion to 5 litres available).

DIMENSIONS

- 34(H)* x 14(D) x 23(W) cm *add 0.5cm for feet
- Weight: 9.6kg (bare unit), 15kg (installed).

**WHY
PERFORMANCE
METRICS ARE
BULLSH*T
AND WHY
COMPARING
THEM IS A
WASTE OF
YOUR TIME
AND MINE.**

A peculiarity of the rules that govern security fog machines means that although performance must be tested, the results do not have to be accurately reported. What kind of bullsh*t is that?

We want to change things. (There's more on this topic in our [blog](#), which you can read next time you have a spare half hour.)

So, what are our real, tested performance results?

The S35 has a performance of 196m³/minute when tested to the EN 50131-8 standards.

Remember: If you put this next to another datasheet, you may not be looking at comparable numbers. Numbers in isolation can only tell you so much, and there are other factors that affect the final outcome. If you really want to find the best security fog machine for you, ring us and talk to an actual human being.

In a world where trust is everything, trust the people who truly know their stuff. Call us now!
