NEED PROTECTION?
F*CK THE GRID, **JUST
GO!**

SENTINEL=GO

SENTINEL GO

POWER IS OPTIONAL, PROTECTION IS NOT.

Sentinel Go is a premium battery-powered security fog generator that deploys **dense, white security fog** in seconds — obscuring valuables and disorienting intruders when it matters most.

Designed for locations where traditional infrastructure isn't practical, Sentinel Go removes the need for a fused spur and avoids continuous heater power draw, helping reduce installation cost and ongoing energy consumption.

Sentinel Go can operate in **three different ways**; as a standalone battery unit, trickle-charged, or fully powered from an appropriate power supply for continuous monitoring — offering flexible deployment regardless of the site's configuration.

Sentinel Go still integrates with alarm systems in the same way as standard units, allowing for activation by traditional alarm systems, wireless relays, or standalone units.

SENTINEL GO WORKS ANYWHERE.

PERFORMANCE

- **Standalone battery** operation for off-grid protection without external power
- **Trickle-charged** operation when connected to a suitable supply, extending deployment time while maintaining fog readiness
- **Fully powered** operation for continuous charging and unlocking full monitoring capability, similar to a traditional installation
- Performance varies depending on system load and operating conditions.

FEATURES

- Two-position fog output for flexible installation options
- Adaptable charging: 12 to 24 volts and 250mA / 1A
- 3-year warranty *batteries not included
- Compatible with LDC1214 batteries - **Supplied dependant on territory - please ask your supplier*
- Extreme temperature operation: -10°C to 50°C
- £10 million product and public liability insurance
- 3 inputs and 6 outputs.

FUTURE COMPATIBILITY

- IP Upgrade available for link to *Sentience Programme*.

CONSTRUCTION

- Rugged and compact steel casing in white / black
- Replaceable batteries for easy servicing and reduced downtime
- Instantly heated coil provides immediate fog generation.
- 2x LDC1214 batteries required

STANDARDS COMPLIANCE

- EN50131:8 and IEC62642:8
- CNPP Rating: Class I Category 30.

FLUID

- 500ml fluid bladder.

DIMENSIONS

- 37(H) x 14(D) x 30(W) cm
- Weight: 16.4kg *including fluid and batteries.

WAREHOUSE TO WILDERNESS, EVERY SITE PROTECTED!

**VACANT PREMISES. FARMS.
WAREHOUSES. RETAIL STORES.
CONTAINERS. HOMES. VEHICLES.
CONSTRUCTION SITES. OFFICES.
ANYWHERE.**

Sentinel Go is protection straight out of the box, no delay. Drop it into any high-risk space and it transforms exposed ground into a no-go zone within seconds.

Whether you're protecting a building mid-renovation, a site between phases, a property sitting empty, a location with unstable power, or a fully serviced premises where you simply want a smarter install, Sentinel Go adapts to any site.

Sentinel Go delivers professional-grade fog protection wherever you need it.
